2018 Statistical Reporting

The following is a compilation and review of the crimes, reports, citations, calls for service and related statistical information for 2018. Several reports also make a comparison between 2015, 2016, 2017 and 2018 statistics. The data to compile this section was obtained through the in house Metro Alert records management system, our training files, Police Department Unit Commanders and the Pennsylvania State Police Uniform Crime Reporting System. This information is the best and most accurate information available to complete the report. However as with all systems of information there may be minor discrepancies due to different record keeping procedures.

The statistical information is separated into two sub-sections. Sub-Section A contains statistical data for the year 2018. The department continues to track activities that all of our police officers engage in everyday that do not cause them to generate a police report. These miscellaneous activities may be actions similar to providing someone with directions, directing them to additional government resources for assistance, investigative background checks, traffic posts or business checks. While these activities do not result in a criminal arrest they are a vital component of police service to our community and their importance is reflected in the number of occurrences. The first graph of Sub-Section A depicts this category. Sub-Section B contains a multi-year comparison of statistical data over the years 2018, 2017, 2016 and 2015.
