

## Township Line Road Bridge over Cobbs Creek Repair Project

The Pennsylvania Department of Transportation (PennDOT) Engineering District 6-0 is proposing repairs to the bridge carrying State Route 1 (Township Line Road) over Cobbs Creek. The bridge is located on the border of Haverford Township, Delaware County, and the City of Philadelphia. The repairs to this bridge will prevent further deterioration and restore the structure to good condition.

A portion of the project will take place around the bridge in Carroll Park and Cobbs Creek Park, which are Section 4(f) resources owned and/or maintained by the City of Philadelphia Department of Parks and Recreation (PPR). Two known recreational trails are located within Carroll Park – Carroll Park East Trail and Carroll Park West Trail. Access to these trails will be maintained at the Farwood Tot Lot playground off of Farwood Road, and at the end of Carroll Road. The trails are connected to the Grange Estate Trails through the Haverford Township Parks and Trails network. The portion of the bridge repair project area on the south side of Township Line Road is also within Cobbs Creek Park/Golf Philly City Line Driving Range.

The bridge repairs will require approximately 0.08 acres of required right-of-way (RROW) from Carroll Park. The trails within Carroll Park will not be impacted by the bridge project. The bridge repairs will require a total of 0.09-acres of RROW and a 0.73-acre temporary construction easement (TCE) from Cobbs Creek Park/Golf Philly City Line Driving Range to allow access to the bridge during construction. A construction access path will be built south of the bridge utilizing the Golf Philly City Line Driving Range parking lot and will be coordinated with PPR. The project will not adversely affect the activities, features, and attributes that qualify these properties for protection under Section 4(f); therefore, a de minimis use Section 4(f) form will be prepared by PennDOT. Please submit any comments by 8/31/2022.
